Duration	3 mins 8 secs
Grade	**13.00** out of 15.00 (**86.67**%)

Question **1**

Correct

Mark 1.00 out of 1.00

Which of the following is a conventional searching technique?

- a. Dynamic search
- b. Hashing
- c. Binary search
- d. Linear search ✓

Question **2**

Incorrect

Mark 0.00 out of 1.00

What is the first step in binary search?

- a. Compare the target element with the first element in the list
- b. Divide the list into two equal parts
- c. Compare the target element with the middle element in the list
- d. Sort the list ✗

Question **3**

Correct

Mark 1.00 out of 1.00

In binary search, how is the middle element determined?

- a. By comparing each element sequentially
- b. By dividing the list length by two ✓
- c. By starting from the first element
- d. By using a hash function

Question **4**

Correct

Mark 1.00 out of 1.00

In linear search, if the target element is not found in the list, what is the result?

a. The first element is returned
b. An error is raised
c. The last element is returned
d. The search is considered unsuccessful ✓

Question **5**

Correct

Mark 1.00 out of 1.00

During a linear search, what is the maximum number of comparisons needed to find an element in a list of size n?

a. log n
b. n/2
c. n ✓
d. n-1

Question **6**

Correct

Mark 1.00 out of 1.00

Which method of searching involves sequentially comparing each element until a match is found?

a. Linear search ✓
b. Jump search
c. Binary search
d. Hashing

Question **7**

Correct

Mark 1.00 out of 1.00

In _____ checks the elements of a list, one at a time, without skipping any element.

a. Linear search ✓
b. Hash search
c. Both (1) & (3)
d. Binary search

Question **8**

Correct

Mark 1.00 out of 1.00

In a linear search, how many comparisons are made in the worst-case scenario to find an element in a list of size n?

- a. n ✓
- b. n/2
- c. log n
- d. 1

Question **9**

Correct

Mark 1.00 out of 1.00

Which of the following is not a limitation of binary search algorithm?

- a. Must use a sorted array
- b. Requirement of sorted array is expensive when a lot of insertion and deletions are needed
- c. There must be a mechanism to access middle element directly
- d. Binary search algorithm is not efficient when the data elements more than 1500 ✓

Question **10**

Correct

Mark 1.00 out of 1.00

What is the advantage of binary search over linear search?

- a. Binary search has a lower time complexity on large, sorted lists ✓
- b. Binary search works on unsorted lists
- c. Binary search can find multiple instances of the target element
- d. Binary search does not require dividing the list

Question **11**

Correct

Mark 1.00 out of 1.00

What is the best-case time complexity of linear search?

- a. O👎
- b. O(log n)
- c. O(n log n)
- d. O(1) ✓

Question **12**

Correct

Mark 1.00 out of 1.00

What is the key characteristic of binary search?

- a. It can be applied only if the list is sorted ✓
- b. It always starts from the beginning of the list
- c. It works on unsorted lists
- d. It compares elements sequentially

Question **13**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

- a. In the right sublist ✓
- b. At the beginning of the list
- c. In the middle of the list
- d. In the left sublist

Question **14**

Correct

Mark 1.00 out of 1.00

Which of the following best describes the process of a linear search?

- a. Skipping every second element
- b. Checking each element sequentially ✓
- c. Sorting the list before searching
- d. Dividing the list in half repeatedly

Question **15**

Incorrect

Mark 0.00 out of 1.00

What type of search would be most appropriate for finding an element in a list that is frequently updated?

- a. Interpolation search
- b. Binary search
- c. Hash search ✗
- d. Linear search
